

1960 Restored Railway Louvre Carriage Van

In 2020, the N&DHS received a donation of two vintage railway carriages, which are now part of the external display at the Noojee Heritage Railway Station Precinct. This display also includes the J550 vintage steam locomotive, a type that used to transport timber from Noojee to Melbourne and beyond.

The Louvre carriage has been completely restored and turned into a unique presentation space. It's quite spacious, measuring 12 metres long, 2.8 metres wide, and 2.5 metres high. We absolutely love showcasing this piece of history and hope you come by to see it!
